

I was working at Mawenzi hospital as a doctor. The process to get the working permission was very complicated, chaotic, expensive and took more time than expected. Nevertheless, after receiving the permission and starting working at Mawenzi hospital it was a great and remarkable experience. The colleges at Mawenzi Hospital were outstandingly welcoming and helpful. The work at the hospital gave me the opportunity for insights into the health system and medical daily routine in Tanzania. The accomodation was perfect and the people at „Kili cottages“ (where we stayed) just adorable. We are very thankful for our stay in Moshi.
